

REMARKS

This Amendment is submitted supplementary to the previous Amendment and in connection with the interview with the Examiner.

During the interview the Examiner indicated that he would consider the claims presented in the previous Amendment. At the same time, he said that a claim defining the pin means on the slaving element and on the add-on part, which extend in the same direction would patentably distinguish the present invention from the prior art.

In connection with this, applicant added claim 28 which defines this feature.

Reconsideration and allowance of the present application is most respectfully requested.

Should the Examiner require or consider it advisable that the specification, claims and/or drawings be further amended or corrected in formal respects in order to place this case in condition for final allowance, then it is respectfully requested that such amendments or corrections be carried out by Examiner's Amendment, and the case be passed to issue.

Alternatively, should the Examiner feel that a personal discussion might be helpful in advancing this case to allowance, he is invited to telephone the undersigned (at 631-549-4700).

Respectfully submitted,

  
Michael J. Striker  
Attorney for Applicants  
Reg. No. 27233
